DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Douglas A. Chaikin registration # 29,140 on March 8, 2006.

The application has been amended as follows:

Cancel claims 2, 10 and 11.

In claim 1, line 3, after 'comparator,' -- the control means includes programmable means for establishing an array of columns and rows defining the points for accumulating counts of pulse voltage levels at time offsets during the duration times and for creating a voltage threshold window that moves between a minimum and maximum voltage with changes of rows of the array -- has been inserted.

In claim 9, line 3, after 'comparator,' -- establishing an array of columns and rows defining the points for accumulating the event counts at time offsets during the defined duration times; creating a voltage threshold window that moves with respect to a minimum and maximum voltage threshold wherein the voltage

threshold window changes with respect to the rows of the array, -- has been inserted

In claim 3, line 2, replace '2 ' with --1—

In claim 12, line 2, replace '12 ' with --9—

In claim 13, line 2, replace '12 ' with --9—

Remarks: Amendments to claims 1 and 9 were made to define over the applied prior art in light of the specification. A conference was held with Mr. John Barlow on Jan. 26, 2006 to discuss the difference between the art of record and the claim invention.

Allowable Subject Matter

2. Claims 1, 3-9, 12-16 are allowed.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:

Independent claims 1, 7, 8, 9 15 and 16 contain allowable subject matter. None of the prior art of record shows or fairly suggests the claimed invention.

Regarding claim 1:

The primary reason for the allowance of claim 1 is the inclusion of the apparatus for measuring characteristics of a bit stream of binary pulses including the control means includes programmable means for establishing an array of columns and rows defining the points for accumulating counts of pulse voltage levels at time offsets during the duration times and for creating a voltage threshold window that

moves between a minimum and maximum voltage with changes of rows of the array. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 3-6 are allowed due to their dependency on claim 1.

Regarding claim 9:

The primary reason for the allowance of claim 9 is the inclusion of the method for determining characteristic of a bit stream of binary pulses including establishing an array of columns and rows defining the points for accumulating the event counts at time offsets during the defined duration times; creating a voltage threshold window that moves with respect to a minimum and maximum voltage threshold wherein the voltage threshold window changes with respect to the rows of the array. It is these features found in the claim, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes this claim allowable over the prior art.

Claims 12-14 are allowed due to their dependency on claim 9.

Regarding claims 7, 8, 15 and 16:

Please see the applicant's response filed on 01/23/2006 for reason for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

Art Unit: 2863

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
